

Case Study - Hospitality

Sandman Hotel, Aberdeen

Project Specifications

Product Specified: NHD08.44

Colour Specified: Ice Grey

Sector: Hospitality

Project Description

Located in one of Aberdeen's historic buildings at the heart of the city, Sandman Signature Aberdeen Hotel is Sandman Hotel Group's first hotel in Scotland, third in the UK, and provides bold, luxurious accommodations steps away from key attractions in the Granite City. The Hotel itself is situated in the former Robert Gordon University St Andrews Street campus and is a historic building which contributes to the architectural landscape of the city with 218 beautifully appointed guest rooms.

The hotel required long lasting, beautiful to look at, anti-slip stair nosings that would stand the test of time... the contractors specified Genesis NHD08 with an Ice Grey insert - perfect choice!
