

## Case Study - Commercial

### Meadows House, London

#### Project Specifications

Product Specified: RezTred®

Colour Specified: Black

Sector: Commercial

#### Project Description

RezTred® was installed at Meadows House in London.

Meadows House is situated on the south-western side of Queen Street close to its junction with Curzon Street. All the amenities of Mayfair are within close proximity to Green Park underground station that's only a short walking distance away.

On-site it was prepared and installed by our very own Richard Howells (Flooring South West & Wales Area Manager) – it increases slip resistance on entering and exiting the offices situated there to avoid slips and falls.

We provided support to GNC contract services to get this project completed promptly and efficiently.

With a simple installation process, RezTred® can be applied onto virtually any surface including natural stones, terrazzo, ceramics, porcelains, glazed tiles, metal treads, wood, and glass.
