

Case Study - Hospitality

Tunnel Club, Nottingham

Project Specifications

Products Specified: AHD23

Insert Colours: 16 Black

Sector: Hospitality

Project Description

Welcome to Nottingham's newest nightclub, Tunnel!

Tunnel delivers two floors of unparalleled sound with LED Walls, unique intelligent lighting systems and sleek bespoke visuals.

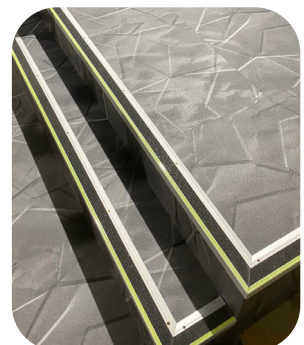

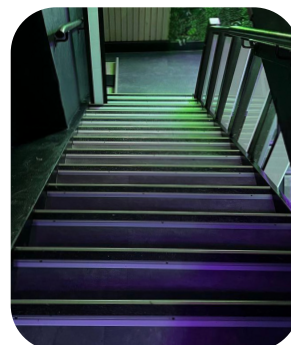

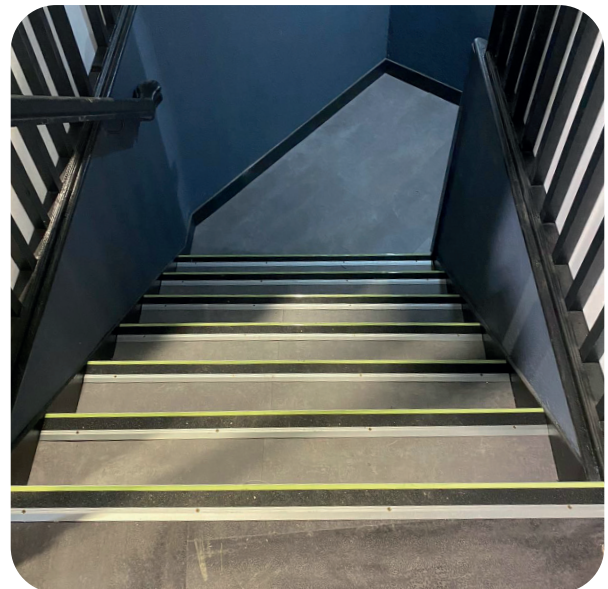

Inside the nightclub, JSlack Flooring installed Genesis AHD23 stair nosing and included the amazing **Aluminator®** strips with an external grade silicone carbide insert.

Aluminator® was installed to highlight the steps when the nightclub was in use, easily identifying the steps when changes of light occur and prevent accidents during busy (and dark) times.

To help further prevent trips and falls, the staircases had external grade silicone carbide installed, this reduced the trip hazard and kept in line with the overall quality and finish to this amazing new construction.

The project looks amazing!
