

# NRA

## Product Description

Genesis NRA profile is a strong well designed, innovative Aluminium profile designed to provide a simple, safe secure edge for steps covered in ceramic tiles or similar.

The profile sits on top of the floor covering providing a perfect step edge with a grooved profile face for extra grip.

## Technical Details

NRA profiles are available in different anodised finishes and powder coated finishes - All natural Aluminium (Mill Finish) has a oxide film of approx 0.2 microns, when Mechanically & Chemically polished the anodising process increases this to 5 microns, up-to 20 for the Matt finish and 100 for powder coated.

Aluminium AA 6063 T6 / UNS A96063 anodised to DIN 17611	
Si%	0.2-0.6
Fe%	0.35
Cu%	0.1
Mn%	0.1
Mg%	0.45-0.9
Zn%	0.1
Cr%	<0.01
Al	Balance

## Maintenance

Genesis NRA does not require any special maintenance. Oxidisation film on Aluminium may be removed with a common polishing agent; however, they do reoccur.

Damaged anodised finishes may only be repaired by re-coating. Aluminium must be tested to verify its suitability if chemical stresses are anticipated. Cementitious materials, in conjunction with moisture, become alkaline.

Since aluminium is sensitive to alkaline substances, exposure to the alkali ( depending on the concentration and time of exposure) may result in corrosion (aluminium hydroxide formation). Therefore, it is important to remove adhesive or grout residue from visible surfaces.

In addition ensure that the profile is solidly embedded in the setting material and that all cavities are filled to prevent the collection of alkaline water. The anodised layer creates a finish that retains a uniform appearance during normal use. The surface, however, is susceptible to scratching and wear and may be damaged by tile adhesive, mortar, or grouting material.

Therefore, setting materials must be removed immediately. Otherwise, the description regarding Aluminium applies.

## Dimensions

Stock Lengths are available in 2.77m. The profile has a 50mm wide (W) tread and 30mm front face (D).

## Installation

1. Check the fit of the nosing and ensure that the profile is firmly placed against the riser of the step, if required mark the floor.
2. Drill the sub floor and plug accordingly. (If screw fixing is desired)
3. Apply any contact grade adhesive to the bottom of the profile and to the tread where the nosing is to be fixed.
4. Place the nosing in position and leave to set.
